

# Jorge Cluuney

## Summary

Highly motivated foundation year 2 doctor who strives to deliver excellent patient care. I have worked in a variety of clinical settings including community-based placements and fast paced accident and emergency, coping well with many new challenges. I integrate with ease into any team and adapt quickly to new roles and responsibilities. I aim to establish a good rapport with patients as I believe this is key to patient care. Throughout my undergraduate career I have developed a range of skills and experiences, many of which are detailed below, which would allow me to progress through a career in psychiatry with ease.

## Work Experience

### **Royal Oldham Hospital, Foundation year 2 Doctor (FY2)**

**Dec 19 – Mar 20**

Currently working in a busy accident and emergency department receiving minor and major trauma as well as medical and psychiatric emergencies.

- Regularly see undifferentiated and often unexpected patients ranging from medical emergencies to minor ailments.
- Confident in managing common medical conditions independently and minor trauma cases
- Recognise and respond to abnormal physiology
- Work well in a busy, fast paced environment and cope effectively under time pressures
- Use problem solving skills daily to differentiate well from unwell patients and how to manage complex cases
- Integrated well into multi-disciplinary team and have established good rapport with colleagues
- Improved my experience and increasing my confidence with dealing with medical emergencies
- Regularly liaise with wide variety of other specialities and as such have honed my communication skills
- Gained experience in dealing with professions such as police and social work
- Planning to undertake audit reviewing patient admissions with recreational drug ingestion to ensure consistent and appropriate management of these patients
- Communicate effectively in difficult circumstances (ie, intoxicated patients, frustrated relatives and at times aggressive patients).

### **St Mary's Medical Centre, Oldham (FY2)**

**Aug 19-Dec 19**

I worked as part of a well-established General practice team where I consulted patients independently in my own surgeries.

- Regularly reviewed approximately 15 patients a day
- Attended house visits alone with confidence
- Able to recognise when patients required referral to secondary care
- Thoroughly assessed patients' histories, examinations, and management plans in time limited consultations
- Maintained accurate medical records and documented patient case history in detail
- Gained experience working with infants and children
- Involved in health promotion incentives and provided services such as the flu vaccine
- Worked closely with health visitor and district nurses to ensure safe patient care

### **Respiratory Medicine North Manchester General Hospital, (FY1)**

**Apr 19-Aug-19**

Worked as a crucial member of a well-run respiratory ward as an FY1 doctor

- Clerked in all new patients to respiratory ward, taking extensive respiratory histories and examining patients
- Opportunity to work closely with specialist teams including pulmonary vascular team and cystic fibrosis teams
- Responsible
- Responsible for ordering and reviewing investigations for patients acting accordingly with abnormal results
- Opportunity to work closely with specialist teams
- Responsible for ensuring discharge documentation completed in an appropriate time manner for patients
- Spoke in an empathetic and caring manner with relatives of patients nearing end of life care.

**Vascular and General Surgery, Manchester Royal  
Surgical Foundation Year 1 Doctor**

**Dec 18-Apr 19**

I was based mainly on the vascular unit with 5 weeks spent covering general surgery where I also spent on time on-call

- Worked on call receiving GP surgical referral patients
- Reviewed and managed acutely unwell patients on surgical wards
- Communicated effectively verbally and in writing patients that required review at shift handover
- Provided pre-operative assessments for patients undergoing operations
- Looked after post-operative patients and dealt with post-operative complications including sepsis, bleeding and myocardial infarction.

**General Medicine, Western Infirmary**

**General medical foundation year 1 Doctor, Manchester Royal**

**Aug-Dec 18**

Worked as an FY1 on busy general medical ward as well as spending 4 weeks on acute medical receiving ward

- Became competent in using healthcare IT systems
- Mastered core medical procedures required for foundation year completion including cannulation, catheterization and arterial blood gases
- Facilitated smooth running of ward rounds
- Enhanced clinical knowledge by attending scheduled teaching sessions
- Worked on call out of hours managing acutely unwell patients and recognising when to seek senior advice
- Presented interesting case at junior clinical forum

**Further courses and Training**

- Basic surgical skills course – hosted by royal college of surgeons of Manchester. Nov 2018
- Royal college of psychiatrist's student associates conference at international congress, London 06/19
- Immediate life support recertification course- Dec 2019
- Clinical skills for foundation doctors – NMGH Sept 2019
- Advanced life support course – booked for May 2020

**Education**

- **University of Manchester** - MBChB: Medicine, with commendation
- **University of Manchester** - BSc: Medical Sciences, 1<sup>st</sup> Class

**Interests**

Outside of medicine I have a variety of interested which helps me keep a balance in work/life. I am a keen sailor and run for the Prestwich harriers' group.
