

ACF Platform Science and Bioinformatics Programme Details in conjunction with Lancaster University

Recruitment to posts starting in August 2021

Post availability

There is one post available in either General Practice or Paediatrics or Public Health Medicine.

- General Practice – You can apply at ST1 or ST2 level in this round of recruitment.
- Paediatrics – You can apply at ST1 level in this round of recruitment.
- Public Health Medicine – You can apply at ST1, ST2 or ST3 level in this round of recruitment.

Overview

You can find generic information about Academic Clinical Fellowships in the North West plus links to the National Institute for Health Research's guidance via <https://www.nwpgmd.nhs.uk/nih-academic-clinical-fellowships-glance>

Any ACF working within this theme would carry out research within the Centre for Health Informatics, Computing, and Statistics (CHICAS) (<http://chicas.lancaster-university.uk/>), housed within the medical school and would also have access to the University's cross-cutting Data Science Institute (<http://www.lancaster.ac.uk/dsi/>).

The ACF could work on their own research within the extensive number of projects, datasets and methodological expertise of the centre. Within Lancaster Medical School, CHICAS is a world leader in the development of spatial, longitudinal and spatio-temporal statistical methods and their application to substantive problems in the biomedical and health sciences ([see http://chicas.lancasteruniversity.uk/projects/](http://chicas.lancasteruniversity.uk/projects/) for current projects).

The platform science and bioinformatics theme will be offered in three possible specialties – public health medicine, general practice and paediatrics where we have established research expertise and would provide academic clinical medical supervision in addition to supervision provided by CHICAS.

Clinical Training

You can find out more about the clinical training programmes in the North West via the following link - <https://www.nwpgmd.nhs.uk/specialty-schools>

Clinical person specifications can be found via the following link -
<https://specialtytraining.hee.nhs.uk/Recruitment/Person-specifications>.
