

Neurodiversity Assessments

We follow national guidance regarding assessing doctors for neurodiversity. If appropriate a case manager will refer a doctor for assessment with [Genius Within](#). They will work with the doctor and support them to navigate any recommendations made from the assessment.

Please note we cannot provide clinical diagnosis for neurodiversity, including dyslexia, dyspraxia, ADHD, or ASC. Our aim is to gain better insight into the workplace challenges that certain individuals may face and support them to navigate these successfully.
