

## **North Manchester General Hospital**

North Manchester General Hospital's Emergency Department is a busy DGH, Type 1 seeing around 110,000 patients per year, 30,000 of patients which are children and seen in its dedicated AV separated Paediatric Emergency Department.

North Manchester General operates as part of a wider Manchester Foundation Trust, about to commence with the build of an entire new hospital. On site specialities include ICU; Anaesthetics; Obstetrics & Gynaecology; OMFS; Surgery; Trauma & Orthopaedics; Paediatrics; General Medicine; large Respiratory team; tertiary ID service for GM and Gastro-enterology and Cardiology.

Its executive team proactively involves junior doctors in all levels of decision making and an active junior doctor leadership forum.

North Manchester General's current team of consultants have interests in Leadership; Management; Education and Simulation. In addition to a developing CESR programme, it also has a clinical fellow development programme, and first global health fellowship post in GM. Amongst a well-established and growing ACP team which are F2s, GPSTs, and now EM HSTs in department.
