

# North West SuppoRTT Course Trauma and Orthopaedic Surgery Day 3

This session is aimed at doctors returning to the programme after a period out of training and doctors new to the training programme.

The day will aim to:

- Cover commonly seen on call scenarios
- Familiarise doctors in training with commonly used implants (including saw bone workshop)
- Trial of VR equipment

The session is being facilitated by Miss Danielle Wharton, Consultant Orthopaedic Surgeon & School of Surgery SuppoRTT Champion who will aim to tailor the day for those doctors who can attend, in terms of level of training and specialty they are returning to.
