REMOTE RETURN TO TRAINING
COURSE FOR PAEDIATRIC TRAINEES

Wednesday 8th July 2020

This course aims to support paediatric trainees as they return to training following a period of planned leave or prolonged absence. Paediatric trainees of all grades are welcome- around the time of their return back to work from any type of time out.

The course will run via Panopto. There will be a team of experienced paediatricians and neonatologists as well as fellow trainees delivering a mixture of live streamed webinars and pre-recorded lectures. We will also run a general question and answer session about the return to work process.

Each delegate will be emailed a course pack including helpful resources and references.

Course topics include:
- Resilience and development in paediatric training
- Practicalities; RTT policy, KIT days, ePortfolio
- Hot topics in paediatrics and neonatology
- Neonatal simulation scenarios – pre-recorded

Places can be booked by contacting: pg-education@alderhey.nhs.uk

Please send details of name and year of training and whether you received your Panopto log on details when you went out of programme.

The full programme details will then be emailed out to you.
