### Training Details

#### (Description of post)

This is a run-through-training post for 5 years. It is assumed that the appointee will pursue the full 5 year training to Consultant level. The trainees may rotate after 3 years to a different regional unit for the remaining 2 years.

These posts are available to commence 1st October 2022 on the Orthodontic Speciality Training Programme in the North Western Deanery. The post is 5 years in duration and will satisfy the requirements for the Membership in Orthodontics of The Royal Colleges and the ISFE. The Training Programme is based at the University Dental Hospital of Manchester, with clinical commitments at South Manchester University Hospital (Wythenshawe Hospital). The posts will be allocated an NTN in Orthodontics.

**Duties and Responsibilities of postholder**

These are non-resident posts at the hospitals in the training scheme.

The appointments are for 12 months in the first instance, renewable subject to satisfactory reports to a total of 5 years. The posts will comprise all aspects of orthodontic practice, including attendance at new patient clinics, management and treatment of malocclusion in children and adults.

There are no out of hours on-call commitments. There is a commitment to cover casual patients according to a departmental rota.

Study leave facilities are available in accordance with the Terms and Conditions of Service subject to the approval of the Educational Supervisor and the Programme Director.

Administrative duties will include attendance at departmental meetings and undertaking some departmental administration.

The junior doctor accepts that he/she will also perform duties in occasional emergencies and unforeseen circumstances at the request of the appropriate Consultant, in consultation where practicable with his/her colleagues both senior and junior. It has been agreed between the profession and the Department that while juniors accept that they will perform such duties, the Secretary of State stresses that additional commitments arising under this sub-section are exceptional and in particular the juniors should not be required to undertake work of this kind for prolonged periods or on a regular basis.

The post holders may wish to register for an MSc. degree at the University of Manchester or other institution which is undertaken over 3 years part-time.

**Description of main training site**

Orthodontic Department – Manchester Dental Hospital

The clinical facilities were re-equipped in 2017 and are situated in the West quadrant of the dental school. Orthodontics has sole use of 8 fully equipped dental units, plus access to a large multidisciplinary clinic that is composed of its own waiting area, three dental surgeries, one seminar room and oral hygiene room. The clinic incorporates University and Trust network access points on each dental unit

The secretarial offices are next to the main clinical area.

There is also a staff area this is equipped with 4 computers, scanners, printers and digitiser. These computers have access to the AJO and JCO via the network and also direct links to the on-line versions of the Journal of Orthodontics, European Journal of Orthodontics and the American Journal of Orthodontics.

The Regional Cleft Lip and Palate centre is situated in the new Manchester Children's Hospital.

### **Description of second training site**

Wythenshawe Hospital is located close to Manchester Airport, approximately 8 miles from the city centre. It provides the full district general hospital range of services along with regional and supra regional specialist services. It is a large teaching trust with strong education and research links with the University of Manchester.

#### Orthodontic Department

This is part of the Maxillofacial Unit and the Division of Surgery. It provides a secondary and tertiary consultation service for the specialist orthodontic practitioners and general dental practitioners in the area, and other hospital specialists.

The department treats predominately complex and multidisciplinary cases. There are well established joint clinics with our Maxillofacial and Restorative colleagues and strong links with the North West sleep lab and medical physics.
